Subject: Incomplete Permit, Cody Harding, Rockwalls and Waterfalls, S/023/092, Juab County, Utah

Dear Mr. Harding:

On July 27, 2006 the Division received your Small Mine Permit and your application fee. We have completed our initial review of the application and can not determine it complete. You need to submit a better map showing the five acres of disturbance you want to permit. The attached rules outline our requirements regarding maps and scales.

R647-3-105. Project Location and Map.

The notice of intention shall include a location map and an operations map. Each map shall be plotted at a scale to accurately identify location landmarks and operations details.

1. The general location map shall be the scale of a USGS 7.5 minute series map or equivalent (1"=2000') and identify new or existing access roads.

2. The operations map (1"=200' or other scale as determined necessary by the Division) shall identify:

2.11. The area to be disturbed;

2.12. The location of any existing or proposed operations including access roads, drill holes, trenches, pits, shafts, cuts, or other planned exploration activities; and

2.13. Any adjacent previous disturbance for which the operator is not responsible.

Please attempt to put together a map that defines your disturbance including roads and pits. Any questions please contact Tom Munson at 801-538-5321.

Sincerely,

A handwritten signature in cursive script that reads "Susan M. White".

Susan M. White
Mining Program Coordinator
Minerals Regulatory Program
